SUMMARY

Advanced Systems Engineering student focused on backend development and web solution design. Experienced in building RESTful APIs, working with relational databases, authentication, authorization, and modular architectures using Python/Flask, TypeScript, NestJS, and Next.js.

Currently deepening my knowledge of hexagonal architecture, software design approaches, DevOps, Docker, cloud infrastructure, and security applied to development. Looking to join a team where I can contribute technical value while continuing to grow professionally.

EDUCATION

**Systems Engineering** 03/2022 - Present  
Universidad Tecnológica Nacional - Regional La Plata (UTN-FRLP) - Bachelor's Degree in Systems Engineering

Strong knowledge in analyzing and developing software solutions. Skilled in problem identification and resolution, with a focus on building efficient and maintainable systems.

Experience in system maintenance and management, along with strong soft skills and effective communication with end users.

CERTIFICATES

**Cloud Computing** ↗ 03/2026 - 05/2026  
Educación IT  
IaaS - SaaS - PaaS - Docker - Kubernetes - Virtual Machines

**Python for Data Analysis** ↗ 03/2025 - 05/2025  
Educación IT  
Pandas - Numpy - Matplotlib
